Vittoria Corsa Control: the strongest winter bike tire for competitions

Vittoria has expanded its range for the world's best-known and most-used cotton tire with the [Corsa Control](#). This version in the Corsa series is a direct successor of Vittoria's much appreciated Pavé tire.

Corsa Control comes from the demand for a product that will handle the most extreme racing conditions. Whether the competition is held on cobble stones, in rainy or slippery conditions, or on rough and poor road conditions, the Corsa Control is designed specifically for such purposes.

Using the finest [320 TPI CoreSpun-K](#) casing with aramid reinforcement as well as a larger and thicker tread (0.4 mm thicker than the Corsa), this new tire is every competitive rider's best bet to face winter conditions and come out ahead unscathed. Stronger and more puncture protected than ever, the Corsa Control is the winter bike tire using a flexible casing and 4 compound-tread to deliver the best performance in speed, grip, durability and puncture protection.

[Vittoria 4C](#) (4 compounds) technology combines four different layers of unique compounds in order to optimize each area of the tread for the performance the rider needs. The tread is hand-glued onto the cotton casing, unlike nylon-based tires where the rubber is forced and vulcanized into the casing. This eliminates tension and friction between tread and casing, offering the maximum flexibility.

Corsa Control tread is powered by [Graphene](#). Effectively, the introduction of Graphene allows for natural material barriers of rubber to be removed, which means that there is no longer the need for compromises between speed, grip, durability and puncture resistance. All these features are now reaching their maximum possibilities.

The Corsa Control has its own unique tread pattern design for enhanced wet grip, increased durability and dynamic performance benefits. Following the trend of larger volume tubulars in road racing, the tubular version of this product is also available in 30-28" sizes. In addition to Vittoria's classic para sidewalls, all versions are also available in full black.
